Guide for the Preparation of Manuscripts for *The Appraisal Journal*

ALL MANUSCRIPTS submitted for publication are reviewed by members of the Advisory Board or the Editorial Board, as well as occasionally by outside specialists when their counsel is particularly appropriate. When circulated for review, each manuscript is identified only by the title and not by the name of the author. The decision on use of a manuscript is typically made within six weeks, at the latest, from the date of its receipt. If it is necessary to return a manuscript for changes, the author is furnished with specific recommendations by the reviewers.

Each manuscript should be accompanied by a synopsis of approximately 100 words. Incorporated in this synopsis should be a statement of the significance and significant points of the article, as well as pertinent biographical material about the author.

The following specific guides should be followed by authors:

1. In order to maintain anonymity of the author when the manuscript is in the process of review, only the title should preface the body of the manuscript.
2. Submit two copies of the manuscript, the original copy of which must be on white bond paper. A third copy should be retained by the author for his files.
3. The 8½ x 11 size of paper should be used. All copy must be typewritten and double-spaced, including quoted matter, footnotes, and bibliographies. Ample margin, 1½-inch suggested, should be left on all four sides of each page.
4. Footnotes should be numbered consecutively and should give all facts of publication or source of quoted material used in the manuscript.
5. Charts, tables, maps, drawings, and photographs enhance a manuscript, and authors should use these devices if appropriate. The author should indicate with penned notations at exactly what points the illustrations refer. Photographs must be printed on glossy paper. Drawings, charts, maps should be clean, sharp black and white. Tables and tabular matter should be typed, each on a separate sheet. All illustrative material should be properly captioned or titled.
6. The author should insert brief sideheads to emphasize major thoughts in his manuscript.
7. *The Appraisal Journal* follows *Webster's New Collegiate Dictionary* for spelling and other usage.
